### WIND ENERGY - United Diversity

35% of wind energy is dissipated within 1000 m of the earth's surface [ 2 ]. There-fore, the available wind power that can be converted into other forms of energy is approximately  $1.26 \times 10^9$  MW. Because this value represents 20 times the rate of the present global energy consumption, wind energy in principle could meet entire energy needs ...

### CHAPTER 1 Fundamentals of wind energy

Wind energy systems draw on a wide range of disciplines. Any prospective user, regardless of his background, will feel large gaps in his knowledge, areas where he does not even know what the question is, let alone where to go look for the answer.
